

Mitt Arv Product Management Internship Assignment

Process & Submission Guidelines

We heavily rely on processes and guidelines as we work asynchronously. One core aspect of any good Product team is to understand the requirements and articulate them well. Please go through the below requirements thoroughly. Any major miss in complying to the guidelines for submission, subject of email etc will automatically disqualify your application.

Your submissions for the assignment details laid out below should be sent via email to careers@mittarv.com with the following guidelines

- Email Subject: “<Your Name> - Application for Research Analyst Intern role for Cohort Q2 2023”
- All submissions must be in form of attachment.
- Each attachment should have a filename “<Your Name> - Research Analyst Intern Assignment Attachment <x> of <y>”
- **Internship location choice:** The body of the email should also mention whether you opt for Hybrid Internship or Work from office Internship
 - i. Hybrid Internship: 6 months minimum mandatory internship with 8-12 weeks of training period. Mandatory to spend 45 days in any of the 6 months in Mitt Arv Hyderabad office
 - ii. Work from Office Internship: 3 months minimum mandatory internship with 4-6 weeks of training period. Mandatory to spend 80% of weekly internship time in Mitt Arv Hyderabad office

Cohort Based Hiring:

To simplify onboarding and training, we are introducing Cohort based hiring where we will hire interns across different teams (Software Engineering, Product Management, UI / UX). This cohort will start on 1st September 2023, and it is mandatory for you to join us, if selected, on 1st September 2023

Our Stipend Structure:

The stipend will be 5,000 INR per month (prorated) during the training period. Thereafter, the stipend will be between 10,000 INR per month to 15,000 INR per month depending on performance during training, skillset and abilities. The stipend for post training internship period will be mentioned 1 week before the training is completed.

Assignment:

1. Showcase through any means what interests you in this role and working for Mitt Arv
2. Based on your understanding, highlight the difference between Analyst and Analytics and confirm you are applying for a Research Analyst position. This question is specifically asked to ensure you know what you are getting into.
3. Last month, there were some media articles and information on Mitt Arv and its launch. Collate all information you can about Mitt Arv from publicly available information and Provide a summary of what you can find.
4. Research on topics of death-tech and legacy-tech, look at the competition available in India and Globally and present the summary of your research

Evaluation Criteria

Someone who is given to research goes through all publicly available information and should have a penchant to segregate relevant vs irrelevant data. Even more important is presentation, how succinctly and accurately you are able to present the summary of your research to the leadership team for actionable insights.

The evaluation will really be on your presentation, both from a content, presentation and aesthetics purpose.

Think of this role as an “Internal Journalist” + “Business Consultant”
